

Be a part of a World Class Technology!

Network Administrator

Superior Cabinets Network Administrator will be an integral part of building and maintaining our I.T infrastructure in our quest to be a world class I.T Department.

Network Administrators have a passion for solving complex problems and providing out of the box, innovative solutions! At Superior Cabinets "it's not all about the wood", we put our people and our customers first. By joining our team, you will have the opportunity to participate in renowned internal and external training opportunities, and be a part of the implementation of new technology such as cloud computing and virtualization.

Along with participating in these exciting new ventures the Network Administrator will also:

- Lead small to midsize projects to plan, design, develop and maintain the computer systems infrastructure
- Evaluate, maintain and recommend changes to the overall data network (LAN/WAN)
- Assist in the purchasing and installation of hardware, software and telecommunications equipment
- Manage overall network performance to ensure maximum uptime and minimal threat
- Deploy network system policies and procedures
- Perform system installs, upgrades, maintenance and repairs

If you are motivated by innovation and drive by success, the Network Administrator position is your career opportunity!

As this is a challenging position candidates must have working knowledge of desktop and server operating systems. Experience leading I.T projects and post-secondary education is a definite asset.
